

Here is the recipe:

All-natural Beeswax Lotion - 30 minutes to make (got from Tracy at oursimplehomestead.com)

- 1/2 cup beeswax, freshly grated or [beeswax pellets](#) (you can find them at [Amazon](#))
- 1 cup organic olive oil
- 1/2 cup coconut oil
- 1/2 teaspoon Vitamin E oil
- 30 drops of your favorite essential oil (There are so many choices, but a few of my favorites are ...grapefruit, lavender, eucalyptus or peppermint.)
- 1-pint jar or 6 – 2oz cosmetic jars with lids (I bought mine at Amazon)

Instructions:

Using a double boiler or heat-safe bowl place pint jar in the pot of simmering water. Melt beeswax, olive oil, and coconut oil until melted and blended. Remove from heat and cool for 15 minutes. Add Vitamin E and your favorite essential oil. Stir until blended and pour into 2 oz containers or leave in a pint jar. Let cool until solid and cool to the touch. They are ready to use and share!
